SECURITY OPERATIONS CENTER-AS-A-SERVICE

According to one report, the leading cybersecurity risks in 2022 included the rise of malware and ransomware attacks, the continued threat of zero-day attacks, and remote code execution exploits.¹ Whether you realize it or not, your organization is under siege from a growing number of cyber criminals. The FBI reported that cybercrime cost U.S. businesses \$6.9 billion in 2021.² The question is no longer whether you are at risk, but instead what are you doing to mitigate that risk?

Neway's SOC-as-a-Service Solution

If your business has a traditional setup, then you have an IT infrastructure with a disparate mix of security products. This lack of integration prevents you from having clear visibility into your security risks and challenges.

Neway helps you meet these challenges with a SOC-as-a Service solution – an efficient and cost-effective way to protect your business. We work with you to evaluate your current security profile and identify areas of risk. Leveraging the latest in Microsoft technology, we offer you an advanced, unified, fully cloud-based SOC to ensure you have the cyber protection you need.

Dramatically Reduced Response Time

When it comes to dealing with cyberthreats, response time is critical. The Neway SOC solution doesn't just provide you with alerts, but instead addresses and mitigates threats as they happen. As a result response time is dramatically reduced.

Combining the Neway SOC offering with the Neway Management Services program increases the efficiency of moving from alert to mitigation even further. The seamless process is a huge advantage when dealing with cyberattacks and minimizes the time and resources you need to spend when a threat is detected.

THE
neway

SOC-AS-A-SERVICE OFFERING

Key Components

- 24x7x365 monitoring that ensures ongoing cyber protection.
- Comprehensive alert management from detection to resolution.
- Automated detection and alerts with accelerated remediation to quickly recognize false positives and minimize your involvement to only relevant issues.
- Vendor agnostic solution that supports all major cloud platforms.
- Deploy and leverage Microsoft Sentinel, Microsoft's centralized Security Information and Event Management (SIEM), directly in your environment so that no data ever leaves your system. This gives you full visibility to your system and control over your data.
- Secure email, documents, and sensitive data that you share outside your company.

Benefits

- Detect the presence of adversaries in your system.
- Proactively hunt for adversaries to reduce the time they can operate in your environment.
- Respond by quickly investigating and determining if the intrusion is an attack or a false alarm.
- Recover and restore the confidentiality, integrity, and availability of your workload during and after an attack.

The neway ADVANTAGE

About Neway Technologies

Established in 2004, Neway Technologies provides unparalleled expertise across the Microsoft platform on a global scale. Our solutions incorporate delivering measurable business outcomes through innovative solutions leveraging Microsoft technologies and infrastructure solutions, both on-premises and in the cloud, including Security, Microsoft 365, Azure, Teams, SharePoint, and more. Our customers represent a broad range of industries including technology and communications, manufacturing, finance, government, and defense.

With your critical applications and operations running on the Microsoft cloud, you need a partner, like Neway, who is 100% dedicated to the platform.

- Microsoft Tier 1 Cloud Solution Provider (Direct)
- Azure Expert MSP
- Microsoft Advanced Specializations:
 - » Modernization of Web Applications to Microsoft Azure
 - » Adoption and Change Management
 - » Calling for Microsoft Teams
 - » Meetings and Meeting Rooms for Microsoft Teams
 - » Threat Protection
 - » Windows Virtual Desktop
 - » Information Protection & Governance
- Access to Microsoft funding programs
- FastTrack Ready Partner
- Customized solutions through modular managed services
- Insight into the Microsoft roadmap to help you effectively plan for upgrades and enhancements
- Expertise in Microsoft licensing and subscriptions to help you optimize your entitlement and reduce your overall spend
- Comprehensive architecture, design, deployment, management, and adoption solutions
